

The LS4SS Toilet Lift

LiftSeat®
Powered toilet lifts™

The new LS4SS combines the strength and dependability of stainless steel with our LiftTek™ Core Assistive Technology to create a sturdy and easy-to-clean toilet transfer solution, preventing falls and restoring users' independence bedside or in the bathroom.

Product Highlights

450 lb. weight capacity

Designed for dedicated room use in CLC centers, Long term care centers, assisted living, and nursing facilities

Powder coated stainless steel construction

Waterproof Electronics: IPX6 or greater

Two Lifting Paths available, slight angular tilt or straight vertical raise

Reduces the risk of staff and patient injury by delivering the hip, knee, and ankle joint support required during the sit-to-stand motion path

Moves easily and locks in place to provide bedside and over-the-toilet assistance anywhere in your facility and new minimalistic design allows for use in tighter spaces

Converts facility toilets to taller ADA height and increased weight rating without costly construction and plumbing modifications

Ergonomic, easy-to-clean transfer seat with stable grab bars which can be lifted to facilitate lateral transfers of toilet and surrounding area

Innovative drop-in commode bucket hygienically accommodates bedside toileting needs

Handheld control pendant gives caregivers the ability to operate the lifting process

The Bedside to Bathroom Toileting Solution

Whether used as a bedside commode or over-the-toilet, the LS4SS's versatile design delivers a safe, stable, easy-to-use toileting solution that greatly reduces the physical force required by caregivers to help patients on and off the toilet. The LS4SS also moves easily from room to room to support a facility's toileting needs.

Grab Bars

Rigid Grab bars provide increase stability.
Flip up grab bars available.

Flat Transfer Seat

Wide, ergonomic, easy-to-clean transfer seat is built into the seating platform base.

AC Power unit

Extended DC Battery option available.

Over-the-Toilet

The LS4SS helps facilities comply with today's taller ADA toilet height and increased weight requirements without costly construction and plumbing modifications.

When not in use, store unit over toilet (LS4SS Pictured)

Handheld Control

Handheld control pendant gives caregivers control of the lifting process.

Commode Bucket shown in picture
